Copying the Display Files to the Office Workstation

If you have not already done so at the Office Workstation, pull down the "File" menu and choose "Passwords". On the password screen press the "Edit Options" button. This will bring up the following screen.

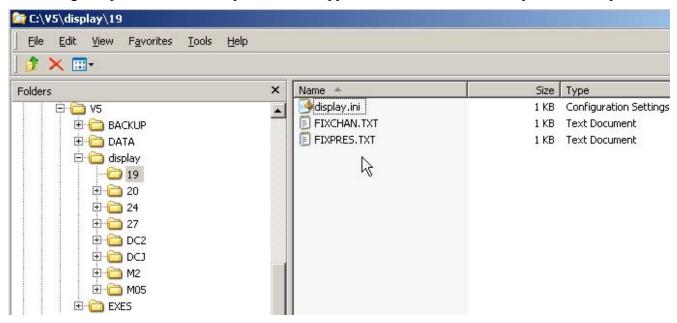

Options	x
Use Part Based Corner Parameters and Trend Chart Setups	for None) Monitor Wire (0 for None) Clear Monitor Wire on Down
Multipart Runlist Settings 🔲 Use Multipart Runlist (This REPLACES the	Warmup Part) Wire 1 Wire 2 Wire 3
Password Levels 1 Restore DEFAULT password after this many minutes. FasTrak Board Monitor Read Current Pos./Analog Values appears on the main menu FasTrak Board Interface appears on the main menu. 15 Opto Test, Command Port Access, etc. Sure-Trak Control Interface Have Sure-Trak Control FT2 Only Hide Sure-Trak Limit Switch Wires 11 Edit the Control Program button	Plot Program 10 Purge Alarms and Downtimes 10 Edit Operators Buttor Part Setup 10 Change Parameter Setups 0 Save Changes 10 Save All Parts Edit part on another computer Edit current part on another computer Edit sure-trak setup on another computer Show setup sheet on Part Setup
✓ Use Valve Test Output Use Null Valve Output 10 Exit Menu	10 Edit the setup sheet
Corner Parameter Display Limite	w Warning C High Warning C High Alarm w Warning C High Warning C High Alarm Cancel Copy to Network No Network

Check the "Use Part Based Corner Parameters and Trend Chart Setups" checkbox as shown and then save your changes.

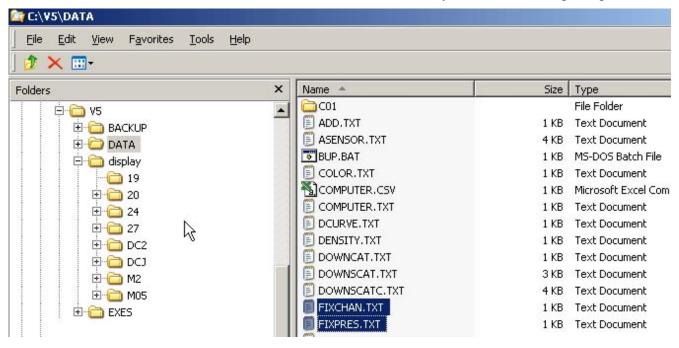

The display setup files will now be saved in sub directories in the "c:\v5\display" directory. The name of each sub-directory is the name of the machine. These directories will not be created until you save the display setup for a part on each machine. You can also create the directories manually.

If you have the "Use Part Based Corner Parameters and Trend Chart Setups" checkbox checked on each monitoring computer then the files you want to copy will be in the same directory on that computer

If not, then two of the files will be found in the "c:\v5\data" directory on the monitoring computer...

and the "display.ini" file will be in the "c:v5\exes: directory on the monitoring computer.
